

# READMISSION

---

Students who interrupt the continuity of their graduate programs by not registering for three or more consecutive terms must seek readmission by filing a completed Request for Readmission form with the Registrar. Individuals who have received a graduate degree from Georgia Tech and who wish to reenter to receive an additional graduate degree (at the same level or higher) must confirm with the new major department whether or not a new application is necessary or if the student may apply through Readmission. Readmission forms are available from the Office of the Registrar. For more information, see the policy for withdrawal and readmission.

Students who have been out three or more terms will be required to meet health, lawful presence, and other certification requirements in effect at the time of readmission.
