COMMUNITY OUTREACH

As a flagship institution within the University System of Georgia, the Georgia Institute of Technology is acclaimed, not only in its home state and nation, but, increasingly, around the globe. An important aspect of Georgia Tech’s culture of service includes the work of the Center for Education Integrating Science, Mathematics, and Computing (CEISMC).

From educational partnerships and research to fun programs for students, CEISMC advocates and participates in efforts for systemic changes that lead to improved appreciation and performance in STEM for all students at the level of K-12, especially those under represented in science, technology, engineering and mathematics. With a presence at Georgia Tech-Savannah, CEISMC brings its expertise to the people and schools of southeast Georgia.
