BACHELOR OF SCIENCE IN CHEMISTRY - GENERAL

The School of Chemistry and Biochemistry has a vibrant program of study leading to a Bachelor of Science in Chemistry. The flexibility of the curriculum allows students to study fundamental areas of chemistry while tailoring their degree with technical and free electives to produce a well-rounded experience in preparation for a variety of career opportunities. Students may pursue tailored tracks towards the BS in Chemistry, including those allowing specialization in: pre-health science, biochemistry, business, polymers, and materials options. There are also tremendous opportunities to gain valuable research experience in state-of-the-art laboratories. In addition to coursework requirements, students in the program often participate in a variety of experiential programs, including: undergraduate research, Cooperative work, study abroad, summer internship, and serving as an undergraduate teaching assistant.

Faculty in the school are committed to undergraduate education and several have won awards for excellence in teaching. With a faculty to student ratio of approximately 1:6, the School prides itself on the close contact that it maintains with its undergraduate students. The high quality of the curriculum and faculty is part of the reason chemistry graduates receive job offers at the highest salary levels for BS chemists. Graduates of the BS in Chemistry pursue careers such diverse field as forensics, environmental science, nanoscience, biotechnology, pharmaceuticals in industry or governmental organizations; or they may continue their education in the chemical or biological sciences, or in medicine, pharmacy, dentistry, and law. Chemistry, especially with the biochemistry option (or the stand-alone BS in Biochemistry degree) is a superb preparation for medical school.

Wellness
APPH 1040 Scientific Foundations of Health 2
or APHP 1050 The Science of Physical Activity and Health

Core A - Essential Skills
ENGL 1101 English Composition I 3
ENGL 1102 English Composition II 3
MATH 1552 Integral Calculus 4

Core B - Institutional Options
CS 1301 Introduction to Computing 3
or CS 1315 Introduction to Media Computation
or CS 1371 Computing for Engineers

Core C - Humanities
Any HUM (http://www.catalog.gate.edu/academics/undergraduate/core-curriculum/core-area-c) 6

Core D - Science, Math, & Technology
PHYS 2211 Introductory Physics I 4
PHYS 2212 Introductory Physics II 4
MATH 1551 Differential Calculus 2
MATH 1553 Introduction to Linear Algebra 2

Core E - Social Sciences
Select one of the following:
HIST 2111 The United States to 1877 3
HIST 2112 The United States since 1877

INTA 1200 American Government in Comparative Perspective
POL 1101 Government of the United States
PUBP 3000 American Constitutional Issues
Any SS (http://www.catalog.gate.edu/academics/undergraduate/core-curriculum/core-area-e) 9

Core F - Courses Related to Major
CHEM 1211K Chemical Principles I 4
CHEM 1212K Chemical Principles II 4
CHEM 2380 Synthesis Laboratory I 2
MATH 2551 Multivariable Calculus 4
BIOL 1510 Biological Principles 4

Major Requirements
CHEM 2211 Introduction to Quantitative Analysis 3
CHEM 2311 Organic Chemistry I 3
CHEM 2312 Organic Chemistry II 3
CHEM 3111 Inorganic Chemistry 3
CHEM 3211 Analytical Chemistry 5
CHEM 3380 Synthesis Laboratory II 3
CHEM 3411 Physical Chemistry I 3
CHEM 3412 Physical Chemistry II 3
CHEM 3481 Physical Chemistry Laboratory I 2

Additional Major Requirements
CHEM 4695 Undergraduate Internship (Undergraduate Internship for Academic Credit) 3
or CHEM 4699 Undergraduate Research
CHEM 3511 Survey of Biochemistry 3
or CHEM 4511 Biochemistry I
or CHEM 4512 Biochemistry II
CHEM 4000- 6000-level Electives 6
3000-level Technical Electives 6

Free Electives
Free Electives 13

Total Credit Hours 122

Pass-fail only allowed for Free Electives.

1 CHEM 4681, CHEM 4695, and CHEM 4699 not allowed.
2 Courses must be 3000-level or higher, and from the Colleges of Computing, Engineering, or Sciences and MATH 2552. - Limit 3 credit hours of CHEM 4699.

International Plan

The BS in Chemistry (International Plan) and BS in biochemistry (International Plan) are offered to undergraduate students seeking to understand their majors in a global perspective. Students in this program must demonstrate proficiency in a foreign language; complete coursework in a country/regional elective, international relations, and global economics; and participate study or research abroad experience (usually in the junior year). While abroad, students are required to complete a supervised research experience with a faculty member in chemistry or biochemistry at the host institution. Upon successful completion of degree requirements for the International Plan, a "International Plan" designator is indicated on the diploma. If interested in participating in the International Plan as part of the BS in Chemistry or BS
in Biochemistry, students should visit: www.internationalplan.gatech.edu (http://www.internationalplan.gatech.edu).

**Research Option**

The BS in Chemistry (Research Option) and BS in Biochemistry (Research Option) are offered for students who wish to participate in a research problem under the supervision of one of the fifty members of faculty and adjunct faculty in the School. Participants in the Research Option learn how to address a research problem from experiment design and execution to interpretation of results. There is an expectation that undergraduates who contribute to completed studies will be co-authors on submissions to high-quality scholarly journals. Research projects are available in the traditional areas of chemistry (analytical, biological, inorganic, organic, physical, and polymer chemistry) as well as highly interdisciplinary research areas, such as nanochemistry, polymer and materials chemistry, environmental chemistry and sensors, medicinal chemistry, molecular biophysics, and computational chemistry.

To participate in the Research Option in the School of Chemistry and Biochemistry, students should find a research project with a faculty member in the department and apply online via www.undergradresearch.gatech.edu (http://www.undergradresearch.gatech.edu). Successful completion of the Research Option requires the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select one of the following Research Options: ¹</td>
<td>9</td>
<td></td>
</tr>
<tr>
<td>CHEM 4698/4699 Undergraduate Research Assistantship</td>
<td></td>
<td></td>
</tr>
<tr>
<td>LMC 4701 Undergraduate Research Proposal Writing (complete during the first or second semester of research) ²</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td>LMC 4702 Undergraduate Research Thesis Writing (take during the term in which students complete their thesis) ³</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td><strong>Total Credit Hours</strong></td>
<td><strong>11</strong></td>
<td></td>
</tr>
</tbody>
</table>

¹ supervised research with a chemistry or biochemistry faculty over three or more semesters
² approval of this proposal on project by a committee of two or more faculty
³ submission of an approved thesis

Successful completion of the Research Option is noted on the student's transcript. Students completing this degree may pursue graduate studies in the chemical or biological sciences or research careers in industrial or governmental laboratories.
