The Bachelor of Science in Computational Media is a collaborative effort by the College of Computing and the School of Literature, Media, and Communication (LMC). The program offers a thorough education in all aspects of the computer as a medium: the technical, the historical-critical, and the applied. Program graduates will have both significant hands-on and theoretical knowledge of computing and an understanding of visual design and the history of media. Graduates will be uniquely positioned to plan, create, and critique new digital media forms for entertainment, education, and business communication.

The program requires 36 credit hours of courses in computer science and 30 credit hours of courses in LMC (in addition to the humanities requirement). A substantial number of required courses in each unit ensures that every student has basic competence in:

- computational principles;
- the representation and manipulation of digital media, including graphics and sound;
- software design;
- visual and interactive design;
- digital arts; and
- media theory and history.

After completing required courses, students specialize in a specific area of media computing. Typical specialty areas include:

- Interactive games design: This is one of the fastest growing areas of digital media production and is already a $7 billion industry.
- Special effects: As special effects become more complex and focused on computer-generated imagery, employment in this area will increasingly require expertise in both media and computer science.
- Culturally informed program design: As programming work is increasingly outsourced to nations offering lower labor costs, programming that adds value through a sophisticated response to the needs of specific corporate and group cultures will offer job security to American programmers.

Depending on their coursework within the BS program, students will also be qualified to enter graduate studies in computer science, digital arts, digital media studies, and human-computer interface.

Wellness

APPH 1040 Scientific Foundations of Health 2
or APPH 1050 The Science of Physical Activity and Health

Core A - Essential Skills

ENGL 1101 English Composition I 3
ENGL 1102 English Composition II 3
MATH 1552 Integral Calculus 4

Core B - Institutional Options

CS 1301 Introduction to Computing 1 3

Core C - Humanities

Any HUM 3
Any LMC HUM 3

Core D - Science, Math, & Technology

Lab Science 8
MATH 1551 Differential Calculus 2
MATH 1554 Linear Algebra 4

Core E - Social Sciences

Select one of the following: 3
HIST 2111 The United States to 1877
HIST 2112 The United States since 1877
INTA 1200 American Government in Comparative Perspective
POL 1101 Government of the United States
PUBP 3000 American Constitutional Issues
PSYC 1101 General Psychology 3
Any SS (http://www.catalog.gatech.edu/academics/undergraduate/core-curriculum/core-area-e) 6

Core F - Courses Related to Major

CS 1331 Introduction to Object Oriented Programming 1 3
CS 1332 Data Structures and Algorithms for Applications 1 3
CS 2050 Introduction to Discrete Mathematics for Computer Science 1 3
CS 2340 Objects and Design 1 3
LMC 2700 Introduction to Computational Media 1 3
MATH 2550 Introduction to Multivariable Calculus 4 2

Major Requirement

CS 2261 Media Device Architectures 1 4
CS 4001 Computing, Society, and Professionalism 3

Junior Design Option (Capstone)

Junior Design Option 3,4 6

People Requirements

PSYC 2015 Research Methods 1 4
Select one of the following: 1 3
PSYC 2210 Social Psychology
PSYC 2760 Human Language Processing
PSYC 3040 Sensation and Perception
Select two of the following: 1 6
CS 3750 Human Computer Interface Design and Evaluation 1
CS 3790 Introduction to Cognitive Science
CS 4660 Introduction to Educational Technology

Select one of the following: 1 3
CS 4460 Introduction to Information Visualization
CS 4470 Introduction to User Interface Software
CS 4605 Mobile and Ubiquitous Computing
CS 4625 Intelligent and Interactive Systems

Film, Performance, & Media Studies Requirements

Select one of the following: 1 3
LMC 2400 Introduction to Media Studies
LMC 2500 Introduction to Film
The Computational Media (CM) International Plan follows the Institute model to develop a global competence within the student’s major program of study. It thus integrates international studies and experiences with work in all aspects of the computer as a medium, preparing graduates to plan, create, and critique new digital media forms within an international professional environment.

As in the basic CM program, students following the International Plan will take credit 36 hours of courses in CS and 30 credit hours of courses in LMC (in addition to the basic humanities requirement). Students will also:

1. take three international courses, including one from each of the following categories: International Relations, Global Economics, and a course on a specific country or region;
2. spend two terms abroad engaged in any combination of study abroad, research, or internship;
3. demonstrate language proficiency equivalent to two years of college-level language study (to be determined by testing); and
4. complete a CM capstone course that links international studies with the major.

**Research Option**

The CM Research Plan follows the Institute model to allow students to incorporate research experiences into the major program of study. Students will complete nine hours of credit research work on various aspects of the computer as a medium, working in such areas as computational principles, the representation and manipulation of digital media, software design, visual and interactive design, digital art, and media theory and history.

As in the basic CM program, students following the Research Plan will take 36 credit hours of courses in CS and 30 credit hours of courses in LMC (in addition to the basic humanities requirement). Students will also complete:

**BS/MS Computational Media and Digital Media**

Students who desire to pursue the BS/MS combination in CM and DM must apply to the School after completing at least seventy-five credit hours of work towards the CM degree. Applicants should have shown a cumulative grade-point average (GPA) of at least 3.5.

Students admitted to the program will take a total of twelve credit hours of graduate course work during their final undergraduate year; six credit hours of that work, in DM courses, will count toward the CM Advanced Studio and Capstone requirements and will count for both undergraduate and graduate credit. During the summer term after their fourth year, students will participate in an approved internship program. During their fifth year, students will take a total of 24 credit hours, including either LMC 6800 or LMC 7000, and with no more than three courses taken outside of the DM program.
