

# NEW SEQUENCE OF MATH CORE COURSES

---

## Math Courses Redesigned for Fall 2015

The School of Mathematics announced a new sequence of math core courses starting Fall 2015. The change involved two primary goals which were:

1. to separate the calculus and the linear algebra sequences and
2. to improve the cutting points in the calculus sequence.

The old core sequence of calculus and linear algebra involved MATH 1501, and MATH 1502. However, a large portion of MATH 1502 was material from linear algebra.

In the new math core, the calculus material are covered in MATH 1551, and MATH 1552. The linear algebra material can be covered in one of three equivalent courses:

Code	Title	Credit Hours
MATH 1553	Introduction to Linear Algebra	2
MATH 1554	Linear Algebra	4
MATH 1564	Linear Algebra with Abstract Vector Spaces	4
