MASTER OF SCIENCE IN BIOENGINEERING

The BioE Program is interdisciplinary in that it is not a standalone academic unit like most departments or schools at Georgia Tech. This interdisciplinary graduate program offers advanced courses in bioengineering, engineering specialties, and life sciences combined with training in cutting-edge bioengineering research. The BioEngineering MS degree offered by all home schools with a thesis option requires the writing of a master's thesis on an independent study of a bioengineering research topic under the guidance of a bioengineering program faculty member. Bioengineering research focuses on the development of new or improved physical and mathematical concepts and techniques that may be applied to problems in medicine and biology, including the fundamental study of biological phenomena and development of new medical devices. Some home schools also offer a coursework-only, non-thesis option.

Eight different academic units from the Colleges of Engineering, Computing, and Design make up the program. The BioE Program provides research opportunities for students with any participating program faculty, allowing tremendous diversity and flexibility for research topics and advisors.

Additional information is available at www.bioengineering.gatech.edu/.

Non-Thesis Option

The non-thesis option requires a total of 30 hours - all of which are coursework (no PassFail hours allowed).

At least 24 hours must be 6000-level or higher.

Students must complete course requirements with an average of at least a cumulative GPA of 3.0 or higher.

Code	Title	Credit Hours
Engineering Fundamentals		**6-9**
Biological Sciences		**6-9**
Engineering Mathematics		**3**
Technical Electives		**12**

Thesis Option

The thesis option requires a total of 30 hours - 21 hours of coursework (no PassFail hours allowed) and 9 hours of thesis work.

At least 15 hours must be 6000-level or higher.

Students must complete course requirements with an average of at least a cumulative GPA of 3.0 or higher.

Code	Title	Credit Hours
Engineering Fundamentals		**3-6**
Biological Sciences		**3-6**
Engineering Mathematics		**3**
Technical Electives		**9**
Thesis Hours		**9**

Master's thesis

A student pursuing a MS with a thesis option must complete a master's thesis, which can range from a design project to a fundamental research investigation. An oral defense will be scheduled on the subject matter for the Thesis and the field in which it lies. The thesis defense examination will be conducted by the M.S. Thesis Committee chosen by the student and the thesis advisor and approved by the Graduate Studies Committee and the Dean of Graduate Studies.

Coursework

The distribution of classes in the Engineering Fundamentals and Biological Sciences categories for an MS student is based on the student's prior training. For the thesis option, a student must take 2 of one category and 1 of the other (for a total of 3 courses); for the non-thesis option, a student must take 3 of one category and 2 of the other (for a total of 5 courses). Students should take the greater number of courses in the category that is most distant from their prior training. For example, a student pursuing a non-thesis MS who previously earned a BS in engineering should take 3 Biological Sciences classes and 2 Engineering Fundamentals classes, while a student pursuing a thesis MS who previously earned a BS in neuroscience should take 2 Engineering Fundamentals classes and 1 Biological Science class.
