DOCTOR OF PHILOSOPHY WITH A MAJOR IN INDUSTRIAL ENGINEERING

Doctor of Philosophy with a Major in Industrial Engineering - Applied Statistics Track

The emphasis in this track is on the use of statistics as a science that is employed in a technological environment. Within this context, a student takes fundamental coursework in mathematics, probability and statistics suitable to conduct advanced work and research in a variety of application domains. Among these are quality systems, manufacturing, production, and simulation.

Doctor of Philosophy with a Major in Industrial Engineering - Supply Chain Engineering Track

This program focuses on the design and analysis of manufacturing, distribution, and transportation systems. Students take fundamental coursework in optimization, stochastics, and statistics in order to build a firm base from which to deal with the myriad of issues that arise in settings involving modern supply chain systems modeling and analysis: production and inventory systems, vehicle routing and scheduling, warehousing, and logistics.

Doctor of Philosophy with a Major in Industrial Engineering - Economic Decision Analysis Track

Engineering economic decision analysis is a broad-based area of study that concentrates on both theoretical approaches and the applied methodologies in various decision-making domains within an economic environment. Typical settings that attract students to this program include multicriteria decision-making, capital budgeting, auctions, portfolio analysis and selection, economic forecasting, utility theory, and quantitative finance.

Doctor of Philosophy with a Major in Industrial Engineering - System Informatics & Control Track

Total Credit Hours 31

ISYE 6831 Advanced Simulation
ISYE 6656 Queuing Theory
ISYE 6762 Stochastic Processes II

Statistics
ISYE 6402 Time Series Analysis
ISYE 6405 Statistical Methods for Manufacturing Design and Improvement
ISYE 6412 Theoretical Statistics
ISYE 6413 Design and Analysis of Experiments
ISYE 6420 Introduction to Theory and Practice of Bayesian Statistics
ISYE 7401 Advanced Statistical Modeling
ISYE 7405 Multivariate Data Analysis
ECE 6555 Optimal Estimation

Computing and Algorithms
ISYE 6679 Computational Methods in Optimization
CS 6505 Computability, Algorithms, and Complexity
ISYE 6416 Computational Statistics

Dynamics and Control
ECE 6559 Advanced Linear Systems
ECE 6552 Nonlinear Systems and Control
ECE 6553 Optimal Control and Optimization
ECE 6554 Adaptive Control
ECE 6551 Digital Control
ECE 6556 Intelligent Control
ECE 6120 Automata Theory
ME 6401 Linear Control Systems
ME 6402 Nonlinear Control Systems
ME 6443 Variational Methods in Engineering
ME 6403 Digital Control Systems
ME 6404 Advanced Control System Design and Implementation

Optimization
ISYE 6664 Stochastic Optimization
ISYE 6662 Discrete Optimization
ISYE 6663 Nonlinear Optimization

Elective
Approved Methodology Course

Seminar
ISYE 8014 Contemporary Topics in System Informatics and Control 1

Applications
Select at least one of the following: 3
ISYE 6201 Manufacturing Systems
ISYE 6202 Warehousing Systems
ISYE 6203 Transportation and Supply Chain Systems
ECE 6557 Manufacturing Systems Design
ME 6222 Manufacturing Processes and Systems
ME 6223 Automated Manufacturing Process Planning
ME 6225 Metrology and Measurement Systems
ME 6754 Engineering Database Management Systems

Total Credit Hours 31
It is recommended that students complete the domain and methods core courses before they sit for the comprehensive examination.

A student is not admitted to candidacy until all of the stated course requirements in the Program of Study have been completed.
