

# BACHELOR OF SCIENCE IN PUBLIC POLICY

The Bachelor of Science in Public Policy (BS PP) provides an education that combines strong analytical skills with understanding of a range of substantive policy issues and the political, social, and cultural forces that shape public policies. The BS PP core courses provide students with the broad political, economic, and philosophical foundations of thought pertinent to public policy, a base of rigorous quantitative and qualitative analytical approaches, and a solid understanding of the political and social dynamics that structure policy debates and policy outcomes.

The curriculum moves from disciplinary foundations (in politics, economics, philosophy, and organization theory) to methods of research and data analysis, and to detailed studies of particular policy problems. Students choose two clusters in environment and energy policy, science and technology policy, social and urban policy, philosophy, or politics and policy, and can select electives in additional areas such as information and telecommunication policy, bioengineering and ethics, and regional development policy. All students have opportunities for internships, research, and study abroad or exchange programs. The BS PP program culminates in a senior-year two-semester capstone "task force" in which students work in teams with outside clients (e.g., Centers for Disease Control, Marcus Autism Center, Multiple Sclerosis Society, Atlanta Food Bank) on actual policy problems.

The program's emphasis on the development of problem-solving and analytical skills constitutes a strong comparative advantage for BS PP graduates, many of whom move on to law school, management consulting, public sector policy analysis, or nonprofit management.

### BS/MS Public Policy

The School of Public Policy offers a BS/MS program for students enrolled in the undergraduate program who demonstrate an interest in and ability for additional education beyond the BS degree.

Students in the BS/MS program remain undergraduates until they meet requirements for the undergraduate degree, at which point they receive their BS degree and change to graduate status. Students are eligible to apply for the program after completion of 30 semester credit hours at Georgia Tech (i.e., at the end of their first year), and if they show appropriate progress in their degree program thereafter. Admissions decisions will be based on GPA and judgments of the faculty who have served as advisors or instructors. Continuation in the program requires the student to maintain a GPA of 3.0 or higher in public policy courses. Students participating in this program will be eligible for the six semester credit-hour Graduate Course Option, which allows students completing both the bachelor's and master's in the same discipline to use up to 6 credit hours of graduate-level coursework in the major discipline for both degrees.

The graduate-level credits required in the BS/MS Program are usually as follows:
